EDUCATION

ARIZONA STATE UNIVERSITY

Bachelor of Science in Computer Science

Tempe, AZ

Expected Grad Date: May 2026

SCOTTSDALE COMMUNITY COLLEGE

Associates of Science in Computer Science

Scottsdale, AZ

August 2024

WORK EXPERIENCE

INCORA

Warehouse Associate II

Tempe, AZ

April 2022 – January 2026

- Use warehouse management software and devices daily to maintain accurate inventory and shipping data that is shared among the company and our customers.
- Work with multiple teams in different departments to ensure quotas are met by the end of the day. Lead in daily and weekly meetings to identify safety concerns and opportunities for growth.
- Collaborate with internal IT to troubleshoot, maintain, and configure networked printers and label devices to reduce downtime for the warehouse team.

PROJECTS

ASU TICKET SYSTEM: FULL-STACK TICKETING SYSTEM | JavaScript, React, Node.js, Express, PostgreSQL/MySQL

- Full-stack ticketing system for managing support requests between students, faculty, and sponsors for ASU capstone, developed with other students using Agile/Scrum methodology in two-week sprints.
- Frontend built with React and Material UI, featuring modular components for ticket creation, dashboards, user profiles, authentication, and role-based navigation.
- Backend powered by Node.js/Express, Sequelize ORM, and PostgreSQL/MySQL, providing RESTful APIs, authentication, email notifications and secure access control for admin, TA, instructor, and student roles.

POLYVIEW: POLYMARKET AI AGENT | TypeScript, JavaScript, React, Node.js, Vercel

- Built a full-stack, WebSocket-enabled analytics platform using React, TypeScript, Node.js, and Anthropic Claude AI for real-time Polymarket prediction market insights.
- Designed and implemented interactive market volume and probability charts in React with recharts, seamlessly integrating live backend data and advanced, user-friendly UI features.
- Developed AI-powered chart rendering by enhancing prompt detection and keyword parsing, enabling automatic, context-aware visualization of market data in response to user queries.

U.S. ACCIDENT DATA VISUALIZATION 2016-2023 | R, Tidy verse, Python, Pandas, Matplotlib

- Personal project visualizing the effect external factors such as the time of day, weather, and lighting have on U.S. traffic accident severity and frequency. Utilizes libraries to visualize chart trends over time periods.
- First created in R markdown before being translated and extended further in Python.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, HTML/CSS, Java, SQL

Frameworks/Libraries: React, Next.js, Node.js, Flask, Tailwind CSS, Express, JavaFX, Material UI

Tools: Git, GitHub, PostgreSQL, MySQL, Visual Studio Code

Software Development: Agile, Scrum, Testing & Debugging, API Development, Database Management
